Steve Vai Signature  
Distortion Pedal

**Ibanez**

Photo Credit : ©2007 Michael Mesker

You're stomping all over my brilliant idea, but that's OK, you're supposed to. The goal was to create a schizophrenic type distortion pedal that allows you to have two different settings with two different sounding distortion pedals, all wrapped up in a psycho-delic bullet proof package. Now you can get your dirty little groove on in public... legally.

**Stomp on!**

*Steve Vai*
